## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-6 and 10-15, drawn to a carrying and chocking apparatus, classified in class 294, subclass 152.
  - II. Claims 7, 8, 16, and 17, drawn to a method for carrying a cylinder, classified in class 294, subclass 150.
  - III. Claims 9 and 18, drawn to a method for preventing rolling of a cylinder, classified in class 188, subclass 32.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the apparatus (Group I) can be used to carry an article by placing the article on the ropes between the handles and lifting straight up on each handle without inserting one handle between the ropes as is called for in the method steps of Group II.
3. Inventions III and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as

claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the apparatus (Group I) can be used to carry one or more articles by gripping and lifting up one each handle while the article(s) is supported on the ropes extending between each handle.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
